Dear Liban Landscape Customer,

Enclosed is your Weather Event Summary for November 21 & December 4. We appreciate your continued trust in our team to keep your property safe and accessible during winter.

November 21

Rain / Snow Mix

Total Snow Accumulation: 2-3"

Start: 12 - 3 AM November 21st **End:** 1 - 4 PM November 21st

- Temperature Range: 32-35°F.
- Light snow began falling between 12 - 3 AM November 21st.
- Snow was light in intensity and fell intermittently at first, then became steady between 5-7 AM.
- Temperatures began to rise after 10am on the 21st, which eventually resulted in snow turning to rain between 1 - 4 PM.

Service Performed:

- Clearing* and salting services were performed to prevent icy conditions as light snow transitioned to steady accumulation before melting into rain later in the day. **Clearings were only performed as needed.*

December 4

Arctic Front Brings Snow Squalls and Dropping Temperatures

Total Snow Accumulation: <1"

Start: 2 - 4 PM December 4th **End:** 7 - 9 PM December 4th

- **Afternoon (December 4th, 2-4 PM):**
 - A potent wintry system moved into the area.
 - Snow showers began, initially mixed with some rain.

- Temperatures ranged from 33–37°F.
- **Late Afternoon:**
 - An arctic cold front swept through.
 - Temperatures dropped below freezing into the 20s.
 - Snow showers intensified, with several squalls producing:
 - Heavy snow.
 - Wind gusts of 40–50 mph at peak activity.
- **Evening:**
 - Snow showers became more widespread before tapering into flurries.
 - Snow ended completely between 7–9 PM.
 - Temperatures continued to drop into the teens and single digits overnight.

Service Performed:

- Salting services were performed to prevent ice formation as temperatures rapidly dropped from above freezing to single digits during heavy snow and high winds.
